

## Project Porchlight focused on benefits of clean energy

On behalf of the Hazlet Environmental Commission (HEC), I'm writing to thank the residents of Hazlet who participated in Project Porchlight on June 19, 2010. Funded by the Bureau of Public Utilities and the State of New Jersey Clean Energy Program, Project Porchlight and Volunteer Outreach Coordinator Vicky Allen spread the message of green energy by coordinating local "Blitz" campaigns distributing compact florescent light (CFL) bulbs. Vicky and her group were wonderfully organized, entirely efficient and motivated both HEC members and Hazlet residents to distribute 1,000 CFLs during the Blitz on June 19.

The HEC is very grateful to Vicky and her group for their inspiration and practical help and especially grateful to the volunteers who gave their time to educate fellow Hazlet residents about clean energy. For additional information, visit the HEC on the Hazlet Township website or Facebook.
